Spring Home Tour Set For Sunday

THE BURKE HOME

THE HARVEY HOME

THE GREGOR HOME

The Spring Home Tour, Sunday, April 1, 2 until 5 p.m., planned by the Appomattox Junior Woman's Club, will offer something of interest for everyone.

Conserve energy, with a traditional floor plan was the main idea Mr. and Mrs. John Gregor incorporated in their home. Mrs. Gregor designed the house and her husband drafted and blueprinted the plans from her many detailed drawings. Their home has five levels with a wrap around deck overlooking a lovely wooded lot, wooded lot.

Mr. and Mrs. William Harvey have "come home" to retire. They moved here from Northern Virginia last year and built their lovely Colonial home. A central foyer with winding staircase, formal living and dining rooms only start to describe this beautiful home. Mr. and Mrs. Harvey have collected many interesting items that will be on display.

The two-story home of Mr. and Mrs. William A. Burke is situated on a wooded hillside in Appomattox County. Their home is furnished in the Early American style with several antiques. A hand painted mural decorates one wall in their daughter's room while they have a proud collection of family art work throughout the house.

Each home on the tour Sunday has a character all its own.

The Appomattox Junior Woman's Club hopes everyone will come out for the tour. This project helps an area child further his education. This scholarship is giving each year to a qualifying student.

Birth Defects Serious

Birthdefects are the nation's most serious child health problem, reports The National Foundation - March of Dimes. Among Americans of all ages, more than 60,000 deaths occur annually as a result of birth defects.

Low birthweight is the cause of the greatest number of deaths in the first year of life and is the major cause of disability in childhood, according to The National Foundation - March of Dimes.

Exercise To Reduce

Health Surveys indicate that many people are gaining weight or staying overweight on relatively moderate calorie intakes. Although overeating is probably the major cause of overweight, physical inactivity contributes greatly to the problem.

There are a few encouraging signs that desire for fitness, or health-consciousness, is replacing simple weight-consciousness in the minds of many Americans.

There is growing awareness that a sedentary way of life can contribute to degenerative disease of the arteries and to obesity and its porential complications, most notably, diabetes, says a new pamphlet from the American Medical Association.

There also is a growing preference among Americans for a healthy, physically fit appearance. Emphasis is on condition. Body, skin and hair that are in good condition are widely regarded as necessary for good looks.

You may feel too lazy to get started on a physical fitness program, but it's probably the lack of exercise that makes you feel that way. On the other hand, you may think of yourself as active or energetic because you are always busy—too busy to take time out for vigorous exercise. Some of the busiest people in the world have found time for jogging, tennis or morning calisthenics.

There are all sorts of guides to simple home exercise programs. Or there is jogging or other such activities. Or regular participation in active sports and games, such as handball or tennis. If you are over age 30 or are unaccustomed to vigorous exercise, consult with your physician before starting a program.

But, if you want to maintain good health and to keep the excess pounds off, a regular, vigorous exercise program is a must. For the rest of your life.
